# Introduction

Money was previously used as a medium of exchange. Today, it is used as an economic policy tool. The purpose of establishment of Central Banks is to produce policies for stability in markets.

The world of crypto , which is an alternative to money that is physically controlled and printed by a central institution, started in 2009 with the emergence of Bitcoin. As a result of long processes and time passed, dozens of different projects took their place in markets. Today, it is seen that crypto currencies, which are traded on different platforms on the internet and used as an investment tool, are even more valuable than physical currencies. However, there are also giant organizations that use cryptocurrencies as an alternative to physical money.

Large companies investment in cryptos with high amounts and their positive expectations from cryptos have played a big role in encouraging medium and small-scale investors and evaluating their investments in the digital world.As a result, it is known that there are now more than 70 million digital wallets worldwide. These results indicate that cryptos are slowly starting to become a routine of our daily lives.

# 1. Mission and Vision

The increase in the value of Bitcoin has started to attract the attention of serious investors around the world, and there are other types of digital assets in the market right now besides Bitcoin that are gaining popularity among investors. However, we also see that many new startups are involved in the blockchain.

New digital assets are being launched to raise funds for project development and they are quite successful. We believe that a new digital world will be established as more market resources are allocated to blockchain digital assets. Our mission is to integrate the blockchain industry into daily life, supporting investors and entrepreneurs with a more accessible, safer system.

# Industry Problems and Coins Drivers Solutions

## Current Problem

- High commissions, slow Transactions

## Our Solution

- Blockchain based platform / low fees
- 

## Current Problem

- Not using crypto assets as a means of payment

## Our Solution

- Strategic marketplace partnerships for daily life transactions
- 

## Current Problem

- Difficulty in cross-border transactions

## Our Solution

- Global Digital Finance and Banking Platform / Cross-border Transactions (No Conversion Fees)
-

### Current Problem

- Limited financial banking services

### Our Solution

--Global Digital Banking Platform (Full Banking Services / Debit Cards / Money Transfer)

---

### Current Problem

- Daily Transaction limit

### Our Solution

--Unlimited Transactions

---

### Current Problem

- Low security

### Our Solution

-- 3 times biometric security / Licensed Digital Storage Services

---

### Current Problem

- Lack of compliance procedures in CryptoKYC

### Our Solution

---AML compliance

-----

### Current Problem

- Conversion crypto-fiat / fiat-crypto

### Our Solution

--Trading Coins Drivers on cryptocurrency exchanges / Bank foreign currency exchange

## Platform Overview

As a global integrated trading platform, COINS DRIVERS is designed to provide a variety of transactions such as spot and futures trading, over-the-counter trading, whole network trading and decentralized trading. The infrastructure of the COINS DRIVERS platform supports the diversity of transactions with high security. It offers investors the opportunity to perform high-volume transactions fast and uninterrupted. Coins DRIVERS platform's trading model efficiently matches the market depth of major exchanges around the world while providing high liquidity. We believe that the COINS DRIVERS platform will become one of the largest liquidity providers of digital assets in the world, and we work uninterruptedly with this belief.

### Spot Trading

Coin Drivers platform provides spot trading service. It is sensitive about choosing digital assets from around the world in order to ensure maximum profits for its investors.

### Future Trading

Coin drivers platform has the infrastructure to provide future contract trading services according to the stability of the markets in the next stages.

### Over-the-Counter Trading

The COds Drivers platform is already working to provide B2C and C2C trading modes for global businesses and individuals.

### Whole-Network Trading

Coins Drivers platform will make unlimited transactions available by connecting with global trading platforms simultaneously, allowing users to easily trade from different platforms.

### **Decentralized Trading**

On the premise that security, stability, and efficiency are to be guaranteed, Coins Drivers will start the development and construction of a decentralized exchange simultaneously, and this exchange will be put into operation sometime in the future.

### **Platform Support**

Coins Drivers are seamlessly accessible via web, Android, iOS, PC, Mac OS and H5 mobile browser. Coin Drivers is committed to collaborating with a research team to select the best quality digital assets worldwide, as well as digital assets known as publications, in order to provide top-notch returns to its investors.

## 2. Features

### High Performance Support

Coins Drivers uses high-performance core matching engine technology, which it has developed by leveraging distributed computing technologies such as Google Spanner and BigTable. In this way, large volumes of transactions can be executed simultaneously.

### Security Mechanism

To assure the system's security, stability, and scalability, Coins Drivers uses an innovative multi-layer and multi-cluster system design. Its blockchain nodes use cold/hot wallet technology, with hot wallet using NetGap technology. And, in order to protect the security of user assets, the operation modes of secret keys and addresses are optimised according to blockchain features.

### Sufficient Liquidity

COINS DRIVERS features a one-of-a-kind whole-network transaction methodology that successfully matches the market depth of all major global exchanges, resulting in increased liquidity and a better trading experience. Users can trade with peers on key platforms throughout the world using this technology without ever leaving CODS. We are confident that, with the help of the whole-network transaction system, we will be able to achieve our goals in the future.

## 3. Strengths

### Great Experience

COINS DRIVERS uses an application container technology that is both versatile and dynamic. The Kubernetes scheduling technology automatically adapts the service capacity based on the load. With these technologies, the platform can accommodate tens of millions of users online at the same time while maintaining a pleasant experience.

### Platform

The CoinsDrivers trading system uses high-performance core matching engine technology and leverages distributed computing technologies such as Google Spanner and BigTable. Thus, it offers the opportunity to fast perform high-volume transactions with simultaneous calculations. It can make the order processing speed reach one million transactions per second.

### Technologies

CoinsDrivers is built on the Google Cloud Platform. It adopts cutting-edge Internet technologies, optimizes for the performance of the exchange, provides high performance core matching engines, and supports Scale Out. supports all types of trading such as Spot Trading, Future Contract Trading, OTC and Whole Network Trading. its seamlessly accessible via web, Android, iOS, PC, Mac OS and H5 mobile browser.

### Productst

CoinsDrivers offers its users investment opportunities such as Spot transactions, futures, staking, lending, pool, p2p, wallet. CoinsDrivers selects the best digital assets worldwide for their investors to earn maximum profits.

# GOALS

Positive presumption and ability to contribute, developing a solid, open, and complete air, and treating each individual with COINS DRIVERS traits in mind are all things that should be considered.

Recruiting, enrolling, and retaining the greatest experts for our project, as well as empowering our agents, projecting a "cando" mentality, and fostering a stable and friendly environment.

Proposing what we intend, modifying our direction in response to our statements, and taking responsibility for the results. Being ethically unmovable and direct, as well as permitting certainty by declaring what we intend, distinguishing our actions from our words, and taking responsibility for. Maintaining our commitment to drive a reasonable, better, and verifiably more reliable business for the foreseeable future, upholding the COINS DRIVERS name, dealing with bondholder objections, performing as a director, improving our workforce, and collaborating with business areas and the environment.

## Purposes of CODS Tokens

Deduction of Platform Transaction Fee with Discounts When users conduct transactions on Coin drivers, they will get a discount on the transaction fee if they have CODS, no matter what tokens they trade. Based on the current market value, the system will convert the amount to be paid into equivalent amount of CODS and then the payment will be made with CODS.

## Repurchase Process

When Cods Drivers is launched online, the Cods Drivers team will take out 20% of the income earned by trading fees on the platform every month to repurchase CODS.

# Token Specs.

---

<b>First phase Start</b>	22-06-2021
Number of tokens for sale	200.000.000
Token start rate	0.2 USD
Number of tokens for sale	200.000.000
Acceptable currencies	ETH, BNB, USDT

---

## TOKEN SALE

---

Token Name	COINS DRIVER
Token Symble	CODS
Token Type	BEP20
Token Supply	200.000.000
Token Contract	0x284f1a6bceEe98f23Ad8b240Ca136DC92FbCf0A9
Token Website	<a href="https://coinsdrivers.com/">https://coinsdrivers.com/</a>

## TOKEN DISTRIBUTION

Allocation	Description
Seed supporters	16,000,000 Cods (8%) <ul style="list-style-type: none"> <li>Sold at \$0.20</li> <li>Tokens are vested; 10% unlocked after ICO; 90% over 2 years</li> </ul>
Private-sale participants	10,000,000 Cods (5%) • Sold at \$0.20 - \$0.30 Tokens are vested; 25% unlocked after ICO; 75% over 6 months.
Team and advisors	22,000,000 Cods (11%) • Tokens are vested; 100% after 4 years from ICO
Strategic Partnerships	26,000,000 Cods (13%) • Tokens are released over a period no less than 48 months
Strategic Ecosystem grant pool	26,000,000 Cods (13%) • Tokens are released over a period no less than 48 months
Public-sale participants (ICO)	100,000,000 Cods (50%) • Sold at \$0.30 - \$1 • Tokens are locked until ICO ends
unsold	The unsold quantity will be burned

# Roadmap

Q4 2020

- Confirmation of market research and technical feasibility

Q1 2021

Completion of market research, team building, product development

Q2 2021

Platform models production initiation and testing phases

June- 2021

- Publish the projectwhitepaper
- Starting ICO pre-sales Rounds

Q32021

Partnership for the future EcoSystem

Roadmap continued

Q4 2021

- Ending ICO pre- sales
- 
- Blockchain usage announcement for global Network

December 2021

Complete fundraiser and issue tokens

Q1-2022

- Launching the platform to trading online
- Separation of user wallets (Unsold tokens will be burned)

# The Team and Organization

# Team

Meet our team that will revolutionize investments in the financial market

The CoinsDrivers team is from the United States, Europe, and Russia and Cyprus. Each of our team members has a wealth of professional experience in blockchain technology, software and finance, and they are constantly working to bring you the best trading experience.

**ARTHUR DARWIN**

Founder & CEO

Arthur, has provided managerial and consultancy services in various price comparison companies in USA since 1999

**Louis Jonathan**

CEO & Co-Founder

Louis is Co-founded CoinsDrivers in 2020. Previously an Equity Research Analyst at CitiBank and Hight Capital.

**Avel Miroslav**

Software Engineer

Avel, is the chief technical expert of blockchain, who designs and implements the core matching engine of trading platforms, responsible for managing the technical security team and ensuring the safe and stable operation of the platform. He holds a master's degree in information security from Kazan Federal University specializing in system security and cloud computing. A former VMware R&D engineer involved in the development of SaaS products and SDN solutions. He has many years of experience in the research and development of distributed system platforms

**Kevin Pieter**

Executive Software Engineer

Kevin completed his master's degree at Boston university,. He, has10 years of experience in the blockchain industry, and three years of experience in the financial industry. Kevin is skilled in the productization of software solutions

**Herman Berg**

Product Manager

Herman, who holds a master's degree from University in Russia , has many years of experience in human-computer interaction and user experience design, has led and led the design of trading system products. He once worked for a multinational company that was the world's largest provider of corporate governance and joint e-commerce solutions
